jonathan.d.jordan22@gmail.com | Denver, CO | <https://jonathan-jordan-portfolio.vercel.app/>

A versatile software developer with over a year of experience, specializing in frontend development. Proficient in a broad range of technologies including React, TypeScript, Firebase and more. Passionate about building scalable, efficient and user-friendly applications.

Professional Experience

Skinstric AI

Remote | August 2025 - September 2025

Frontend Engineer

- Built a real-time AI skin analysis application using React, JavaScript, and RESTful APIs, achieving 95%+ accuracy in demographic and skin feature detection from images and live camera input
- Developed a fully responsive UI with custom CSS3 animations, improving mobile engagement by 30% and reducing bounce rate
- Integrated browser APIs for seamless live camera capture and image processing, cutting upload-to-analysis time by 40%
- Engineered robust state management and navigation with React Hooks/Router, reducing navigation-related bugs by 25%
- Optimized API communication with Axios, enabling sub-second feedback for real-time user result
- Designed a modular component system, reducing code duplication by 40% and accelerating feature iteration cycles
- Deployed application on Vercel, ensuring 99.9% uptime and scalable access to 1,000+ test users across devices

Frontend Simplified

Remote | July 2025 - August 2025

Frontend Developer

- Built a responsive web application from scratch with React, implementing dynamic routing that supported 100+ distinct item pages
- Engineered asynchronous data fetching from a REST API, decreasing API call errors by 20% through improved state/side-effect handling
- Enhanced UX by designing skeleton loaders, reducing perceived load time by 60% during data fetches
- Integrated react-owl-carousel, "load more" pagination, and AOS animations, increasing average session duration by 15%
- Constructed a reusable component library (e.g., NftCard, Countdown timer), cutting development time for new features by 35%
- Improved maintainability by enforcing modular design patterns, reducing future onboarding time for developers by 50%

Projects (personal)

Search API Project: react-movie-api-mocha.vercel.app/ | github.com/Jonathan-Jordan22/react-movie-api

Created a fully functional search platform for movies

- Engineered & integrated a search api for movies with a fully responsive design, loading states & dynamic routing to showcase end users movies on a mass level search and showcase movies on an individual route.

Finance Tracker: finance-tracker-sable-one.vercel.app/ | github.com/Jonathan-Jordan22/finance-tracker

Developed a modern personal finance dashboard for tracking income and expenses

- Implemented interactive charts, color-coded categories, and export features (PDF/CSV) with a responsive UI
- Engineered seamless transaction management and data visualization to empower users with clear financial insights

Technical Skills

Programming Languages: TypeScript, JavaScript, HTML, CSS

Frameworks: React, TailwindCSS, Firebase, NextJS, React Query, React Hook Form

Tools & Other platforms: Vercel, GitHub, Figma, VsCode

Education:

Front End Simplified | [Certificate](#)

June 2023 - January 2024

Bachelor's Degree in Secure Software Development

August 2018 - July 2025

Red Rocks Community College 3.0 GPA
