

JONATHAN JORDAN

SOFTWARE ENGINEER

Denver, Colorado, United States | jonathan.d.jordan22@gmail.com | 3038870154 | [LinkedIn](#)

PROFILE

A versatile software developer with over a year of experience, specializing in frontend development. Proficient in a broad range of technologies including React, TypeScript, Firebase and more. Passionate about building scalable, efficient and user-friendly applications.

PROFESSIONAL EXPERIENCE

Frontend Engineer, Skinstric AI

Aug 2025 to Sept 2025

- Delivered a real-time AI skin analysis app in React, integrating browser camera APIs and REST services to process images and live video with 95%+ accuracy.
- Built a fully responsive UI with custom CSS3 animations, boosting mobile engagement by 30% and reducing bounce rate.
- Optimized API communication with Axios, cutting upload-to-analysis time by 40% and enabling sub-second feedback.
- Implemented robust routing and state management with React Router and Hooks, reducing navigation-related bugs by 25%.
- Designed a modular component system, reducing code duplication by 40% and accelerating feature iteration cycles.
- Deployed on Vercel to ensure 99.9% uptime and scalable access for 1,000+ test users across devices.

Frontend Developer, Frontend Simplified

Jul 2025 to Aug 2025

- Built a responsive React application from scratch; implemented dynamic routing supporting 100+ distinct item pages.
- Engineered robust asynchronous data fetching from a REST API, decreasing API call errors by 20% through improved state/side-effect handling.
- Designed skeleton loaders that reduced perceived load time by 60% during data fetches.
- Integrated react-owl-carousel, "load more" pagination, and AOS animations, increasing average session duration by 15%.
- Created a reusable component library, cutting development time for new features by 35%.
- Enforced modular design patterns, reducing developer on-boarding time by 50%.

EDUCATION

Red Rocks Community College

2018 to 2025

Bachelor's Degree in Secure Software Development

- Coursework: Secure Coding (C/C++), Web App Security, Cloud Security, Database Design, OOP, and Software Testing.
- Capstone: Built a secure fullstack web app with React and TypeScript using Firebase Auth; implemented RBAC, input validation, and secure data storage aligned with OWASP Top 10 practices.
- Performed threat modeling plus static/dynamic analysis to identify and remediate vulnerabilities in student projects.
- Collaborated using Git/GitHub, code reviews, and basic CI/CD to maintain code quality.

Front End Simplified

Certificate

- Immersive frontend program focused on React, TypeScript, and responsive, accessible UI development.
- Implemented routing and state management with React Router and Hooks; built forms with React Hook Form.
- Integrated REST APIs with Axios and React Query; added skeleton loaders and pagination to optimize UX.
- Practiced componentdriven design, Tailwind CSS styling, Git/GitHub collaboration, and Vercel deployments.
